

DEBUTS OF WOODY PLANTS IN CULTIVATION

Data on Introduction and First Appearances -- in relation to those in Rehder's MANUAL OF CULTIVATED TREES AND SHRUBS, Ed. 1940.

P. J. van Melle

These data are submitted by way of a casual contribution rather than of an exhaustive study. They represent an accumulation in the compiler's notes -- many of them by-products of other inquiries. The years or blanks in the right-hand columns are those occurring in the MANUAL. Except in the few instances marked "(*)" the nomenclature employed is that of the MANUAL.

The presentation of these data in relation to that work implies no criticism of it. On the contrary, the MANUAL is regarded as a great central structure, about which minor contributions like this cluster themselves like little shops between buttresses of a cathedral. The method saves needless duplication of information conveniently available. Only such data are given here as are at variance with, or not given in the MANUAL. Data of this kind should perhaps always be regarded as more or less tentative -- subject to adjustment upon further investigation. Some allowances should be made for misidentifications of materials in the sources cited. Reasonable care has been exercised to avoid cases of discernible misidentifications.

Intriguing as is the subject of plant debuts, it appears not to have been explored exhaustively. Partly because of the greater accessibility of English literature, much is known, comparatively, about introductions into England, and little about those into continental Europe, the records of which are, moreover, for a large part not readily available. Too little is known popularly about the important introductions from Japan by von Siebold and by Maximowicz, and those by Russian travellers, from Siberia, Mongolia and North-China. Specialized investigation might bring out worth-while facts about seeds and living plants received in Paris from the French missionary, Armand David, of whose introductions little is known. Among them is probably, for instance, the comparatively important Pfitzer Juniper of gardens.

Much study remains to be made of the history of plant introductions before it can be viewed in a proper perspective and in relation to explorations projected from many lands.

A few titles of periodicals, catalogs and other works appearing in the lists in more or less abbreviated form

- A.H.B. Annales d'Horticulture et de Botanique.
Leiden, 1858--1862. Published by von Siebold and W. H. de Vriese. Devoted largely to plants brought from Japan and from Java.
- Ann. Soc. Agricult. Annales de la Société d'Agriculture et de Botanique de Gand.
- Bretschneider E. Bretschneider - History of European Botanical Discoveries in China. 1898.
- Bull. F.S. Bulletin de la Fédération des Sociétés d'Horticulture en Belgique.
- Cox E. H. M. Cox - Plant Hunting in China. 1945.
- Gartfl. Gartenflora.
- Hort. Berol. Hortus Berolinensis. A catalogue of the Botanical Garden at Berlin.
- Hort. Breit. Hortus Breiterianus. A catalog of a semi-commercial botanical collection maintained in Leipsig by Christian August Breiter. 1817.
- Hort. Dinegro A catalog, by D. Viviani, of a botanical collection privately owned by J. Car. Dinegro, in Genoa. 1802.
- Illustr. Hortic. .. L'Illustration Horticole.
- Leiden Many data otherwise unannotated of plants cultivated in Leiden have been derived from a jubilee publication: Hortus Academicus Lugduno Batavus, by H. Veendorp and Baas Becking, 1938. Other data have been derived from old indices of this Academic Garden.
- Montreuil Refers to a "Catalogue des Arbres dans les jardins de M. Lemonnier à Montreuil - copie sur de ms. de l'auteur, dont M. le Prof. Adrien de Jussieu

est en possession." It is dated 1774. We found it, in the library of the New York Botanical Garden, bound in a "Catalogue méthodique des végétaux cultivés dans le Jardin des Plantes de la Ville de Versailles", by F. H. Philippar, 1843.

- Pavlovsk Refers to a catalog, by I. A. Weinmann, of an Imperial Garden in Pavlovsk, near Petrograd.
- Prince Catalogs of the Wm. Prince nursery - the "Linnaean Botanic Garden" - Flushing.
- Rev. Hortic. *Revue Horticole*.
- Soc. Gardeners "Catalogue of Trees, Shrubs, Plants and Flowers both exotic and domestic which are propagated for sale in the Gardens near London". By "A Society of Gardeners". 1730. - The similarity of the style of this work to that of Philip Miller's *Gardeners Dictionary* suggests that he compiled or edited it.
- Von Siebold & Co. . The catalogs referred to include the "Kruidekundige Naamlijsten" in the 1844 and 1845 yearbooks of the *Nederlandsch Koninklijke Maatschappij tot Aanmoediging v. d. Tuinbouw*. (These Yearbooks are the "Annuaire Pays-bas" of some authors).
- Von Siebold "Sur l'Etat de l'Horticulture au Japon et sur l'Importance des plantes usuelles et d'ornement introduites et cultivées dans le Jardin d'Acclimation de M. Ph. von Siebold à Leide". A brochure by von Siebold. 1863.
- Uppsala *Hortus Upsalensis*, 1748. - A catalog, by Linnaeus, of his garden at Uppsala.
